ADDING SHOTS WITH CPT CODES

County health department staff have the ability to select the desired CPT codes for specific vaccine types when adding a shot record. The CPT code drop-down list will appear on the “Add/Change/View Vaccination Record” page.

After logging into Florida SHOTS and searching for your patient’s record, do the following when adding a shot record.

- Select “Vaccinations” under the “Patients” menu item.

- Select “Add a Vaccination Record” from the “Vaccination List” page.

- Fill in the required fields as usual.
- After selecting the program component in the CPT drop-down menu, select the desired CPT code for the dose administered.

ADDING SHOTS WITH CPT CODES

Participants in VFC (PC-01), Non-VFC Vaccine (PC-05), Hepatitis Program Vaccine (PC-09), and Adult Vaccines (PC-17) will be required to select a CPT code for the following vaccines when adding a vaccination that reduces inventory. (A CPT code is optional otherwise.)

- ADENOVIRUS
- BCG
- FLU QUAD P
- FLU TRI P
- FLU TRI PF
- HEP B ADULT
- HEP B DIALYSIS
- RIG

NOTE: The CPT codes available will differ depending on the program component selected. For example, you will not see 90744 for pediatric Hep B if you selected PC 09; and 90740 or 90747 for dialysis doses won't show if you selected PC 01, but all three of these will show if PC 05 is selected as the program component.

The screenshot shows the 'Add Vaccination Record' form. A red arrow points to the 'CPT' field, which is set to '90687 - PEDIATRIC'. Other fields include Vaccine Type (FLU QUAD P), Injection Site (LA-LEFT ARM), Provider Org ID (HILLSBOROUGH CHD), Imm Service Site (MAIN IMMUNIZATIONS), Program Component (01 - VFC VACCINE), and Eligibility (VFC ELIGIBLE-UNINSURED). The 'Date Given' is 02/15/2019 and the 'Injection Route' is IM-INTRAMUSCULAR. A 'Vaccine Information Statements' section is also visible, showing 'INFLUENZA (INJECTED)' with a 'VIS Recipient' dropdown.
